

Updated Product: SubDrive 75 Outdoor Enclosure

We are pleased to announce the release of a new Outdoor Enclosure for our SubDrive 75 units.

As you are aware, the SubDrive 75 controller is rated IP23 for indoor use only.

While we have always offered an external enclosure, the feedback from you that it was too costly and thus discouraged its use, so in our efforts of continuous improvement, we are now able to offer a lower priced custom enclosure.

The new Outdoor Enclosure is rated IP54 and is powder coated, vented, lockable and has a front window to see the SD Controller indicator lights. This enclosure allows the SubDrive 75 Controller to operate inside the enclosure within its design and operational parameters, maintaining the 5 Year warranty.

Model Number	List Price <small>excl GST</small>
305 701 301	*\$ 295.00

*This is a bare enclosure, the SubDrive 75 Controller is not included in this unit or price.

This SubDrive Outdoor IP56 Enclosure will be added into the next Price List update
