

Updated Product: SubDrive Manifolds

We are pleased to announce the release of additional SubDrive manifolds.

SubDrive manifolds save you time but more importantly, they get all of your fittings spaced correctly as recommended in the SubDrive Installation Manual to give your customers the ultimate constant pressure performance and ease of installation for yourself.

Now available in 32mm, 40mm and 50mm stainless steel manifolds, with BSP male manifold threads as well as BSP sockets for the pressure tank and pressure gauge and an NPT socket for the SD sensor.

The manifolds are supplied as standard with matching size discharge gate valve for flow control and a ball valve for pressure tank isolation.

Manifold Kit

Manifold when installed

Tank, Gauge & Sensor are a part of the SubDrive QuickPAK kit.

3 manifold sizes now available

| Size | Model Number | List Price <small>excl GST</small> |
|-------------|--------------|------------------------------------|
| 32mm (1 ¼") | 305 701 165 | \$ 210.00 |
| 40mm (1 ½") | 305 409 106 | \$ 270.00 |
| 50mm (2") | 305 701 284 | \$ 320.00 |

These 3 SubDrive manifolds will be added into the next Price List update
