

New Product: Flexibore Hose Systems

We are pleased to announce that Franklin Electric is now able to offer you a broader pumping System Solution with our new distribution partnership with Crusader Hose.

The Flexibore hose system ensures simple and effective bore water retrieval whether for mine de-watering, municipal, farm or homestead water supply. The flexible yet resilient hose can be installed with great ease compared to rigid pipe. Should the pump need to be retrieved from the bore, it is very easy to extract from the bore with Flexibore.

- Flexibore saves time and money with quick and easy hose installation and retrieval.
- No internal scaling
- Approved to AS/NSZ4020
- Reduced transport costs due to lightweight
- Custom lengths to suit your bore
- Reduced head losses and improved flow rates
- No safety cable required
- Patented couplings, 304 & 316SS materials
- Simple roller wheel or crane install

- 40 to 200mm internal diameters
- 250 metre depths
- Continuous lengths available
- Made in Australia
- 5 Year manufacturer's warranty
