

## Warranty Period Schedule

Applicable from 09/2020

For Franklin Electric (Australia) Pty Ltd

This Warranty Period schedule is updated as new products are introduced.

All failures that are suspected to be warranty failures, should be returned to the dealer of purchase.

Franklin Electric pays for the return freight costs (on our nominated freight service) from the Franklin Dealer back to a Franklin Electric (Australia) location for assessing. Assessing determines whether the product has failed from a warranty related cause or from other induced causes and conditions.
